INDUSTRIAL METALS

Business recycling programs
Manitoba, Saskatchewan, Alberta and Northwestern Ontario
Yard: 550 Messier Street, Winnipeg

Scrap metal programs for businesses

Industrial Metals buys scrap metal at its yard in Winnipeg and runs recycling programs for businesses across Manitoba, Saskatchewan, Alberta and Northwestern Ontario. Steel and shred first, then copper, aluminum, brass and much more.

What we set up

Bins and pickups

Tote boxes, roll-off bins and lugger bins from 8 to 65 cubic yards, short or long term, hauled by our own trucks. Bin size, placement and pickup schedule are set for each site.

Mobile and site recycling

We bring the trucks and equipment to clear scrap yards, auto parts yards and farm sites.

Drop-offs

Bring loads to 550 Messier Street, Monday to Friday, 8:00 a.m. to 4:30 p.m. We weigh, grade and pay.

What we buy

Steel and shred first

Light steel, tin, car bodies and appliances feed our auto shredder. Also heavy melting steel, plate and structural steel, cast iron and scrap rail.

Non-ferrous metals

Copper and insulated wire, aluminum, brass, radiators, stainless steel, lead and batteries, zinc, titanium and nickel alloys.

Also

Catalytic converters, electric motors, starters and alternators, transmissions, electronic scrap and X-ray scrap. Call first about anything sealed or holding fuel, oil, refrigerant or pressure.

How a program starts

1. Call or write

Call 204-233-1908, toll-free 800-567-5116, or email info@industrialmetals.ca.

2. Tell us about the site

Material types and rough volume; site address and access limits; space for bins and safe loading; pickup frequency and the paperwork you need.

3. We set it up

Bin size, placement and schedule for your site, and one contact on each side so changes stay simple.

4. Today's price, by phone

Prices move with the metal markets, so we quote by phone, not in print.

Today's price by phone: 204-233-1908 · toll-free 800-567-5116 · info@industrialmetals.ca
